PROJECTS AND EXPERIENCES

08/2023 - 08/2024	**Book “Un au pair aux États-Unis”** During that year, I wrote a 470-page book: “Un au pair aux États-Unis”.
18/03/2026	**Film “Projet Blood 2” (the colonel)** An extraordinary experience: I play the colonel, a corrupt soldier, in a 2 h 25 feature film.
09/2025 - 05/2026	**Drop Loop** A rainwater collector for balconies, up to 15 litres. With my team, we designed, built and presented it, from the first prototype to two awards we are very proud of. Hubo was our main sponsor.
30/01/2025	**BigMat Haren** A video I also made for Schütte, from the initial idea to the final edit. It shows the installation of the range’s new shelving at BigMat Haren.
03/2026	**After movie BIP 2026** The after movie of a programme that brings together international students who come to Belgium to work on a problem. I produced it myself.
10/2026 - ongoing	**MealVend: healthy meals for students** During my Erasmus, I have to launch a project: I chose a smart vending machine offering healthy, convenient meals for students. I designed two prototypes of it.
08/2024	**3D printing, O&D 3D** When I came back from the USA, in August 2024, I joined my friends in their 3D printing venture. I take care of the website, SEO and GEO. Here are some highlights of that adventure.
